VAIBHAV KUMAR RAI

raivaibhavkumar2@gmail.com | 8521314562 | Lucknow, Uttar Pradesh | www.linkedin.com/in/vaibhav-kumar-rai-b99717374 | github.com/VaibhavKumarRai-eng

Summary

B.Tech Computer Science Engineering student focused on software engineering, backend development, and full-stack applications. Hands-on experience building REST APIs, database-backed systems, and user-facing interfaces. Strong programming foundation in Java, JavaScript, and Python, with expertise in FastAPI, SQL, Docker, and Git/GitHub for collaborative development.

Education

B.Tech, Computer Science Engineering | Babu Banarasi Das University
Lucknow

- CGPA: 8.40
- SGPA: 9.00 (5th Sem), 8.73 (6th Sem)

Class XII (CBSE)

- 71%

Skills

Java, JavaScript, Python, C, React, Next.js, HTML5, CSS, Tailwind CSS, FastAPI, Flask, REST APIs, SQL, PostgreSQL, MySQL, MongoDB, SQLite, Git, GitHub, Docker, CI/CD, VS Code, SQLAlchemy, Uvicorn, Vite, Sanity CMS, Artificial Intelligence, Machine Learning, NLP, XGBoost, Predictive Modeling, Pandas, NumPy, scikit-learn, Matplotlib, Power BI, Excel, Data Visualization, KPI Tracking, Business Reporting, Computer Science Fundamentals, Frontend, HTTP, Testing, Code Reviews, Frontend technologies, Test coverage, Technical writing

Projects

Crisis Sync
Emergency Response Management Platform | Backend Developer & Data Management

- Developed backend APIs and database workflows for a multi-person project focused on incident, resource, and emergency-response tracking using Python, FastAPI, and SQL, making open source contributions and collaborating via pull requests.
- Applied systems design to create monitoring and data-processing flows, supporting faster coordination and more accurate reporting.

AI Diagnose
AI-Powered Disease Diagnosis System | AI/ML & Backend Developer

- Implemented backend APIs with FastAPI for HTTP request handling and integrated a Gemini API workflow to deliver production software that supports intelligent, user-facing medical assistance and responses.
- Built an AI-based diagnosis workflow using NLP and XGBoost to process symptom information and generate disease predictions.

House.AI
ML-Based House Price Prediction | Machine Learning Developer

- Delivered a Python application with serialized model, encoder, and scaler components plus a user-facing prediction interface.
- Built an end-to-end house price prediction workflow with preprocessing, feature transformation, scaling, and trained ML artifacts.

E-Commerce Data Science Dashboard
Data Scientist / Python Developer

- Built a Streamlit dashboard with Pandas and Matplotlib for KPI monitoring, customer summaries, country revenue, and trend analysis.
- Analyzed the UK Online Retail Transactions dataset to identify revenue, customer, product, country, cancellation, and monthly trends.

Certifications

- AWS Solution Architecture Certification
- IBM SkillsBuild Virtual Internship (via FSP) - Generative AI
- Deloitte Data Analytics Virtual Experience Program
- My Bharat Certification

ADDITIONAL

- Languages: Hindi, English
- Soft Skills: Problem Solving, Communication, Team Collaboration, Leadership, Documentation, Initiative
